

FBE 2027 · PHILADELPHIA

COVER

SECOND EDITION

22–23 September 2027 · Pennsylvania Convention Center

RED BIOTECHNOLOGY

Future Biotech Expo

Philadelphia 2027

CENTER STAGE

Cell & gene therapy

The second edition of the United States' dedicated red biotechnology exhibition and conference.

Claim your place

#FBE26 · INAUGURAL EDITION

Built as the United States’ dedicated red biotechnology expo.

The first Future Biotech Expo was purpose-built for red biotechnology — the science at the intersection of biology and human health. It gathered more than 2,500 leaders around a world-class exhibition floor, a two-day conference, structured startup showcases, investor sessions, curated B2B matchmaking, and an exclusive Hosted Buyer Program. #FBE27 keeps that architecture and sharpens the science.

In 2027 the expo returns in Philadelphia — larger, more precise, and with cell and gene therapy as the centre of gravity. The same commercial architecture. A sharper scientific argument.

3,500+	INDUSTRY LEADERS
200+	EXHIBITORS
80+	SPEAKERS
40+	COUNTRIES

Projected 2027 scale, building on 2,500+ leaders at the inaugural edition.

FBE 2027 · PHILADELPHIA

PHILADELPHIA

WHY THIS CITY

They call it Cellicon Valley for a reason.

Penn Medicine's CAR-T pioneering. CHOP's paediatric gene-therapy programmes. The first FDA-approved in-vivo gene therapy, born here. A lattice of hospitals, CDMOs, venture, and talent from University City to the Navy Yard.

Staging #FBE27 in Philadelphia puts every attendee inside the most concentrated cell and gene therapy ecosystem in the United States — with Boston, New York, and the FDA corridor a short hop away.

VENUE

Pennsylvania Convention Center

1101 Arch Street, Philadelphia, PA 19107

22–23 September 2027

Two days. One floor. The science that treats.

#FBE27 · Organised by Maxpo Exhibitions

03 / 08

FBE 2027 · PHILADELPHIA

CENTER STAGE

THE 2027 ARGUMENT

Cell & gene therapy takes the centre of the floor — and the programme.

Six theatres. One question: who reaches patients at a cost the system can bear.

01

Next-generation cell therapy

Autologous, allogeneic, and in-vivo CAR. Durability, antigen escape, vein-to-vein time.

02

Gene editing

CRISPR, base, prime, and epigenetic editors. Precision, immunogenicity, first-in-human.

03

Delivery

AAV, LNPs, and non-viral systems. Tropism, redosing, and the plant behind the construct.

04

Manufacturing & CMC

Closed systems, analytics, comparability, and cost of goods. Scale is the science now.

05

Regulatory & access

FDA and EMA pathways, evidence payers will buy, and the post-approval contract with patients.

06

Pipeline to patient

Oncology, rare disease, autoimmune, and regenerative programmes moving from signal to standard of care.

FBE 2027 · PHILADELPHIA

CONFERENCE

TWO-DAY PROGRAMME

High-calibre sessions for people already shaping the sector.

The inaugural conference was built for operators, not spectators. 2027 keeps that standard: plenary mornings, technical theatres, and closed-door roundtables. Eighty speakers. No filler keynotes. Speaker line-up to be announced.

Day 01

Wednesday 22 September

The science of scale

Opening plenary — Cellicon Valley and the next decade of CGT

In-vivo editing: what actually reaches the nucleus

Allogeneic vs autologous: a manufacturing argument

Vector and LNP theatre with CDMO roundtables

Investor hour — platforms that can be plants

Day 02

Thursday 23 September

The business of access

Plenary — From BLA to bedside: evidence, price, and trust

CMC comparability without slowing the clinic

Hospital systems as manufacturers and buyers

Startup acceleration finals and partnering

Closing conversation — who gets treated in 2030

THE FLOOR

A curated red-biotech showcase with a CGT pavilion at its heart.

The first edition proved the format: products, platforms, and manufacturing innovations meeting qualified buyers — not a general life-sciences bazaar. In Philadelphia the centre of the floor is reserved for cell and gene therapy: processing, vectors, non-viral delivery, analytics, cryo, and the CDMOs who can actually make the dose.

SECTORS ON THE FLOOR

Cell processing	Viral vectors
Non-viral delivery	Raw materials
Analytics & QC	Cryo & logistics
Fill-finish	CDMOs & CROs
Digital & AI	Closed systems

FBE 2027 · PHILADELPHIA

PROGRAMMES

CARRIED FORWARD

Four ways the first edition created deals — all returning, all tighter.

RETURNING FROM THE FIRST EDITION

Hosted Buyer Program

Skip the noise. Meet the right people. Qualified scientific and procurement leaders travel with a pre-set diary of meetings — the deal engine of the inaugural expo, rebuilt for CGT purchasing.

STARTUP ACCELERATION

A stage, not a hallway

Structured showcases, mentor clinics, and a dedicated investor track for companies still proving the platform — the same spine as #FBE26, with manufacturing-ready CGT as the filter.

B2B MATCHMAKING

Curated, timed, followed up

Introductions are scheduled against intent, not badges. CDMO capacity, vector slots, analytics, and capital sit on the same grid.

INVESTOR SESSIONS

Capital, not a pitch queue

Closed-door conversations for funds and strategics who buy platforms, plants, and pipelines — not a corridor of decks.

FBE 2027 · PHILADELPHIA

TAKE YOUR PLACE

WHO IS IN THE ROOM

The people who prevent, diagnose, and treat.

Cell & gene therapy companies

Pharma & biopharma

CDMOs & CROs

Vaccine developers

Diagnostics & genomics

Clinical research

Digital health & AI

Hospital systems & AMCs

Investors & policymakers

Raw-material & equipment suppliers

PARTICIPATE

Delegate pass

Two days of plenaries, theatres, and the exhibition floor.

REQUEST A PASS

Book a stand

CGT Pavilion and the surrounding red-biotech floor.

EXHIBIT ENQUIRY

Sponsorship

Theatres, receptions, and the Hosted Buyer lounge.

SPONSOR PACKS

Hosted Buyer

Apply if you buy, partner, or in-license in CGT.
